

### **Flint River Trail progress**

February 6, 2009

A portion of the trail located in the City limits is being filled and leveled in preparation of rock being applied to the trail. This trail section is located south of Tama Road and north of the abandoned rail bridge over Flint River, which is just north of Case Company.

G & B Contract is completing the fill and grading work as shown in the photos. The frozen Flint River can be seen to the west of the trail in the photo above.
